

# PRINT Gift Tags FROM EQ6 & EQ7

**Step 1:** Download the EQ6 Gift Tags or EQ7 Gift Tags project. Find the project in the location you saved it, then double-click on it to open.

**Step 2:** After you double click to open the project, the Sketchbook will appear. In the Sketchbook, click on the **Blocks** section. The gift tag block is automatically selected, so click the **Edit** button to send the block down to the BLOCK worktable.

Step 2

**Step 3:** Click the **Color** tab at the bottom.

Step 3

**Step 4:** Optional: Using the **Paintbrush** tool recolor as you would like. We suggest a light color for the "Gift Tag" above the box, so you can write your "To" and "From" on the tag.

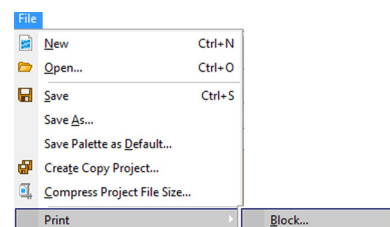

Step 4

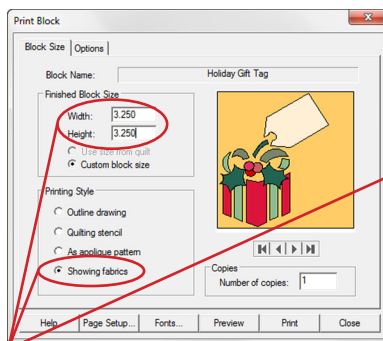

Step 5

**Step 5:** Click **Add to Sketchbook** to save this design.

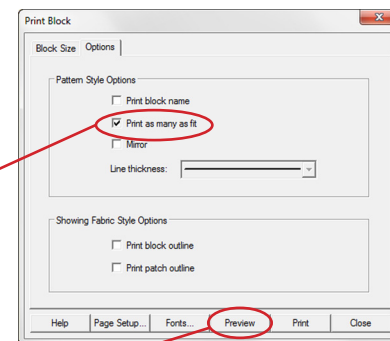

Step 6

**Step 6:** Click **File > Print > Block**. Under Finished Block Size click "Custom block size." Make Width and Height both: 3.250". Under Printing Style select "Showing Fabrics."

Step 7

**Step 7:** Click the **Options** tab. Check "Print as many as fit." Uncheck "Print block name" and "Mirror". Uncheck both "Print block outline" and "Print patch outline" boxes.

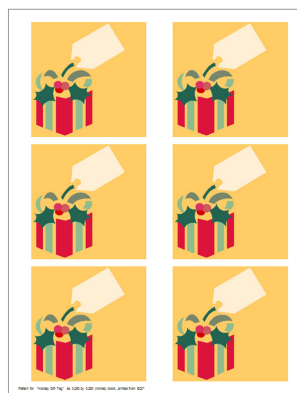

Step 8

**Step 8:** Click **Preview**.

You will see a whole page of labels, because you made the size small enough to fit many labels on a page.

**Step 9:** Click **Print**. Now cut out each label and use a hole punch or scissors to punch a hole in the top-left corner, so you can thread through a ribbon to tie your label to a package. Write your gift message. And did we mention some glitter might be fun?

Step 8
